KINGSLEY UCHENNA ISICHEI

Generalist | AI Evaluation Specialist | Research & Operations Associate | Technical Writer

Email: kingz7792@gmail.com | **Phone:** +234 703 645 2022 | **Location:** Abuja, Nigeria | **LinkedIn:** linkedin.com/in/kingsley-isichei-5a61bb409

PROFESSIONAL SUMMARY

Generalist professional with over two years of experience in AI evaluation, quality assurance, research, technical writing, administrative support, and workflow optimization. Experienced in evaluating AI-generated text, image, video, and multimodal content, including customer-support and AI shopping-assistant conversations spanning order status, tracking, returns, and refunds, while consistently maintaining 98–99% quality accuracy across large-scale AI projects. Comfortable distinguishing merchant versus platform responsibility and writing clear, concise rationale for every label applied. Skilled at producing clear written documentation, conducting research, managing operational workflows, and delivering high-quality results in fast-paced remote environments. Strong analytical, organizational, and communication skills with a proven ability to adapt quickly, solve problems, and collaborate effectively across cross-functional teams.

CORE COMPETENCIES

AI & Content Evaluation: AI Evaluation, Quality Assurance, Prompt Evaluation, Prompt Engineering, LLM Evaluation, Audio Transcription, Bounding Box Prompting, RLHF, Human Feedback, Data Validation, AI Safety, Content Moderation

Consumer & E-Commerce Support: Hands-on user of AI shopping assistants (e.g., Shop) as an everyday consumer; order lifecycle fluency, tracking, returns, and refunds; customer-support escalation paths; distinguishing merchant vs. platform responsibility; concise written rationale for evaluation labels

Research & Writing: Technical Writing, Business Writing, Professional Writing, Documentation, Proofreading, Editing, English Communication

Operations & Support: Administrative Support, Operations Coordination, Project Coordination, Workflow Management, Process Improvement

Technical & Analytics: Data Annotation, Computer Vision Annotation, Audio Annotation, Analytical Thinking, Critical Thinking, Root Cause Analysis, n8n Workflow Automation, Microsoft Office, Google Workspace, Excel

PROFESSIONAL EXPERIENCE

AI Video Evaluation & Quality Specialist — 2026

Turing | Remote

- Evaluate AI-generated video outputs for visual quality, temporal consistency, prompt adherence, and overall user experience using structured evaluation frameworks.
- Produce detailed written evaluations and actionable feedback that support model improvement and dataset refinement.
- Identify rendering artifacts, motion inconsistencies, and edge cases while maintaining a 98%+ quality accuracy rating.
- Perform frame-by-frame quality inspections to ensure annotation consistency, metadata accuracy, and high-quality datasets.
- Collaborate with distributed AI evaluation teams while consistently meeting productivity targets and turnaround deadlines.

AI Data Annotator / Evaluator (Freelance) — 2026

Micro1 | Remote

- Led computer vision annotation and QA for robotics interaction video datasets, verifying object classification, segmentation accuracy, and timestamp precision across 5,000+ samples to support autonomous systems training.
- Applied bounding box, polygon, and semantic segmentation techniques to label complex, multi-object robotics scenes, strengthening dataset integrity for downstream computer vision model training.
- Achieved 98–99% QA accuracy on high-volume computer vision evaluation tasks, catching annotation inconsistencies and edge cases that directly improved object detection and tracking model performance.
- Corrected object classification and segmentation errors across robotics video datasets, improving dataset reliability and reducing rework for model training teams.

- Rapidly mastered new annotation platforms and evolving computer vision evaluation criteria, sustaining output quality under tight, fast-changing project guidelines with minimal supervision.

Image Bounding Box & Prompt Evaluator (Contract) 2026

iMerit Technology | Remote

- Evaluated image bounding box regions to generate highly accurate, descriptive prompts corresponding specifically to the outlined content within each bounding box.
- Reviewed, refined, and corrected pre-generated text prompts for bounding box selections, fixing descriptive errors, ambiguities, and inaccuracies to align precisely with visual elements.
- Ensured prompt accuracy, spatial relevance, and detail adherence to enhance computer vision and multimodal vision-language model training datasets.

Audio Transcription Annotator (Contract) 2026

Uber AI | Remote

- Performed audio transcription and data annotation across audio datasets during project phases to train speech recognition models.
- Transcribed spoken audio into structured text, verifying phonetic accuracy, speaker turns, timestamp alignments, and audio quality edge cases.
- Reviewed complex audio samples, corrected transcription errors, and ensured compliance with strict client quality standards and formatting guidelines.

Legal Virtual Assistant 2026

Harrington & Cole Law Group | Remote

- Managed legal documentation, correspondence, scheduling, and administrative operations across multiple client matters.
- Drafted, proofread, edited, and formatted legal documents, contracts, and professional correspondence with exceptional attention to detail.
- Conducted legal research and prepared concise reports to support attorney case preparation and decision-making.
- Coordinated calendars, meetings, and filing deadlines while maintaining organized workflows and confidential client records.
- Demonstrated excellent written and verbal communication skills while supporting attorneys in a fully remote environment.

AI Quality Analyst (Contract) 2025

TELUS International | Remote

- Evaluated AI-generated content for factual accuracy, reasoning quality, policy compliance, and instruction adherence, including customer-support and shopping-assistant conversations covering order tracking, returns, and refund requests.
- Applied escalation-path guidelines to flag conversations requiring human hand-off, distinguishing issues within a merchant's responsibility from those owned by the platform.
- Conducted structured quality assurance reviews that contributed to a 20% improvement in dataset quality.
- Produced clear, concise written rationale — typically two to three sentences — explaining the reasoning behind each label or evaluation decision to improve annotation consistency.
- Collaborated with evaluation teams to strengthen quality standards and improve decision consistency.
- Flagged harmful or policy-violating content to support responsible AI development and safer model behavior.

SELECTED PROJECTS

AI Evaluation Workflow Automation (n8n): Designed workflow automation pipelines using n8n to automate task routing, reporting, and QA notifications. Integrated APIs and webhooks to reduce manual effort and improve evaluation workflow efficiency. Built an AI-assisted edge-case flagging workflow that improved reviewer prioritization and consistency.

Crowdgen – AI Safety & Content Moderation: Reviewed AI-generated content for safety, relevance, and policy compliance using structured evaluation guidelines. Applied quality ratings and moderation standards that supported AI safety initiatives and improved search quality.

EDUCATION

Bachelor of Science (B.Sc.) – Computer Science / Statistics
Federal University of Agriculture, Makurdi, Nigeria
Relevant Coursework: Data Analysis, Statistical Methods, Probability, Data Modeling, Intro to ML

CERTIFICATIONS & LANGUAGES

Certifications: Micro1 AI Annotator / Content Rater; Essentials of Data Labeling & Annotation – CypherSense

Languages: English: Full Professional Proficiency; Igbo: Native

CORE SKILLS

AI Evaluation: LLM Evaluation, RLHF, Human Feedback, Prompt Evaluation, Benchmark Evaluation, Preference Ranking

Annotation & QA: Computer Vision, Audio Transcription, Bounding Box Prompting, Image Annotation, Video Annotation, Semantic Segmentation, Data Validation, QA Review

Consumer & E-Commerce: AI Shopping Assistant Evaluation, Order Tracking, Returns & Refunds, Customer Support Escalation Paths, Merchant vs. Platform Policy Boundaries

Research & Communication: Technical Writing, Business Writing, Documentation, Proofreading, Editing, Report Writing, Professional Communication

Automation & Tools: n8n, Labelbox, Label Studio, CVAT, Supervisely, Google Sheets, Microsoft Excel, Google Workspace

Programming: Python (Basic)
